No investment costs or regular fees

Join Now and Gain > 1 Million Customers

Register once and buy tickets for all participating transport regions. This is the idea behind HandyTicket Deutschland. To this end, HandyTicket Deutschland combines the timetables and fares of the various transport regions in Germany in a single app. Today, more than 1 million users purchase their daily public transport tickets for buses and trains from over 50 partners in more than 20 transport regions. When will your region be part of this network?

Join us and become a partner now: As an added incentive, partnering with HandyTicket Deutschland does not incur an initial investment or regular fees. Invoicing is based on a fair and transparent commission model that only charges you for tickets you actually sold. The costs of operating,

developing, maintaining and servicing HandyTicket Deutschland are included in this commission. All payment transactions in HandyTicket Deutschland are handled and secured by the LogPay Financial Services GmbH payment service provider. This means that your revenue is secure at all times.

Thanks to the strong partner ecosystem of transport companies and transport associations, you and your customers benefit directly from the ongoing evolution of the HandyTicket Deutschland service. New customer requirements regarding public transport, improvements in the user experience, changed VDV-KA specifications etc. are accounted for centrally and are made available to all partners and customers without the need for action.

One App – Many Advantages

The right ticket for each customer

From single tickets to weekly, regional or tourist tickets through to season tickets: With HandyTicket Deutschland you can offer your customers the entire range of tickets for your region as a mobile ticket for the smartphone. This allows you to address all target groups, including occasional and regular customers or travelers.

Integrate multimodal services

Customers do not want to buy tickets – they want to get from A to B. HandyTicket Deutschland enables you to cover the entire customer journey. Include mobility offers such as car or bike sharing, ride hailing and taxis just as easily as parking tickets and e-mobility charging services.

Convenient ticket payment

HandyTicket Deutschland supports all common payment methods such as direct debit, credit card or prepaid credit by default. You can add further purchasing options such as PayPal, Apple Pay or Google Pay.

Tamper-proof tickets

HandyTicket Deutschland is VDV-KA compliant and generates a VDV-KA barcode for each ticket. Alternatively, barcodes can be output in UIC 918.3 or a HanseCom-specific format.

Security features such as a daily updated keyword, moving elements and a unique ticket ID make all tickets forgery proof.

Easy customer data management

Whether via the app or on the web – the customer portal of HandyTicket Deutschland allows your customers to comfortably manage their account themselves. Among other things, users can change personal or bank data, view their ticket history, print receipts for travel expenses and much more.

Perfect service

The service portal of HandyTicket Deutschland offers your employees everything they need to provide perfect service for mobile ticket purchases. They can manage and edit end customer and sales data, cancel tickets as a goodwill service, generate statistics on ticket purchases or for revenue sharing, and send information to your customers as a text or in-app message.

Data security

The entire storage of HandyTicket Deutschland data is handled by a hosting service provider whose data centers are certified according to DIN EN ISO-IEC 27001 for information security and are operated in Germany.

What users have to say about HandyTicket Deutschland

...I don't have a subscription, but with HandyTicket I don't need to worry about having the right change on hand in Berlin, Cologne or Düsseldorf.
Jonas B. from Düsseldorf

...it's really convenient and quick to use.
Ramona R. from Bonn

...it is a great, useful and eco-friendly tool that is quick and easy to use. And it puts all key features right at my fingertips: tickets, timetables and detailed descriptions. What an app – thanks so much!
Madeleine L. from Goderville

...I always have the phone with me, so I can't forget it the way I'm prone to forgetting regular tickets.
Nina Z. from Berlin

I use
HandyTicket
Deutschland,
because...

...I don't have to wait in line at the ticket machine when I'm in a hurry.
Tobias G. from Werder (Havel)

...it makes me independent of cash and ATMs.
Mario L. from Plauen

...I can access many travel associations without having to install multiple apps.
Benjamin O. from Lüneburg
